

QUALITY POLICY

- Jewett Machine is engaged in the precision contract machining business. **Quality** is our only standard product.
- The craftsmen who produce customer products are responsible for the quality of the product. Quality is “built in”, not inspected into our products.
- Management and employees are committed to adherence to the provisions of the quality management system and to continuous improvement of its effectiveness.
- Our quality system is considered part of our corporate culture and is thoroughly and continually communicated to all members of our organization.
- Our people are our most valued asset. We seek to hire the very best people and continue to improve them through training and exposure to the latest technologies in our field.
- Jewett Machine is dedicated to continuous improvement. We have established quality objectives that are monitored continuously and reviewed periodically for their suitability and effectiveness.
